

## Contactless Payments

### ***Important Safety Tips***

1. Do not keep your cards in easily accessible pockets or bags which will draw pickpockets' attention.
2. Make use of Radio Frequency Identification (RFID) blocking wallets, where applicable.
3. Do not give your card to anyone for payments. Always make sure you are present for card payment.
4. For safety and sanitary precautions, carry out contactless payments yourself instead of handing it over to the cashier.
5. Always ask for a receipt to ensure you were charged the correct amount.
6. Contactless cards provide a tap and go facility. These are no PIN based transactions, which are allowed up to specific limits set by banks.
7. Check your bank balance, and account statement frequently, to ensure that your card is not being misused.
8. Verify your daily transactions using internet banking/mobile banking. Inform your bank if you see anything unusual.
9. Keep your bank up to date with your latest contact details, such as your mobile number and email address.
10. If you believe your PIN (for higher value transactions) has become known to other persons, change it immediately.
11. Be vigilant about any possible loss of your card. Report any card loss and suspected fraud immediately to your Bank.
